

Quadrilaterals

1. Classify each quadrilateral best as *either* a square, rectangle, rhombus, parallelogram, trapezoid, isosceles trapezoid, kite, or quadrilateral. Only one of each shape appears in each row and in each column.

Q	K	P	H	T
I	R	S	T	P
S	I	H	P	R
P	S	T	R	H
K	H	R	S	Q
H	P	I	K	S

2. How many of the tetragons in #1 were best described:

squares?	5	rectangles?	4	rhombi?	5	parallelograms?	5
kites?	3	isosceles trapezoids?	3	trapezoids?	3	trapezia (no // sides)?	4
